

CLAIMS

What is claimed is:

1. An elastomeric article, comprising:
a substrate body made of an elastomeric material; and
a donning layer overlying at least one side of the substrate body, the donning layer comprising 1,2 polybutadiene.
2. The elastomeric article of claim 1, wherein the substrate body has the form of a glove having an inside surface, and the donning layer overlies the inside surface of the glove..
3. The elastomeric article of claim 1, wherein the elastomeric material of the substrate body comprises a mid block saturated styrene block copolymer.
4. The elastomeric article of claim 1, wherein the elastomeric material of the substrate body comprises a styrene-ethylene-butylene-styrene block copolymer.
5. The elastomeric article of claim 1, wherein the elastomeric material of the substrate body is selected from the group consisting of natural rubber latex, nitrile, isoprene rubber, styrene-isoprene-styrene block copolymer, styrene-polybutydiene-styrene block copolymer, styrene-isoprene block copolymer, styrene-butadiene block copolymer, and composition blends thereof.
6. The elastomeric article of claim 1, further including
a surfactant layer overlying the donning layer.
7. The elastomeric article of claim 1, further including
a surfactant layer overlying the donning layer, the surfactant layer comprising

a surfactant selected from the group consisting of a cationic surfactant, and a cationic surfactant and a silicone antifoam.

8. The elastomeric article of claim 1, further including
a surfactant layer overlying the donning layer, the surfactant layer comprising
a surfactant selected from the group consisting of an alkyl dimethylbenzyl quaternary,
an alkyl trimethyl quaternary, a dialkyl dimethyl quaternary, a pyridinium chloride,
sodium lauryl sulfate, and polydimethyl siloxane emulsion.

9. The elastomeric article of claim 1, wherein the donning layer polymer
comprises syndiotactic 1,2 polybutadiene.

10. An elastomeric article, comprising:
a substrate body made of an elastomeric material;
a donning layer overlying at least one side of the substrate body, the donning
layer comprising a chlorinated mid block unsaturated block copolymer; and
a surfactant layer overlying the donning layer, the surfactant layer comprising
a surfactant selected from the group consisting of a cationic surfactant, and a cationic
surfactant and a silicone antifoam.

11. The elastomeric article of claim 10, wherein the cationic surfactant is
selected from the group consisting of an alkyl dimethylbenzyl quaternary, an alkyl
trimethyl quaternary, a dialkyl dimethyl quaternary, a pyridinium chloride, and
sodium lauryl sulfate.

12. The elastomeric material of claim 11, wherein the surfactant layer
further includes a silicone.

13. The elastomeric article of claim 10, wherein the silicone antifoam is
polydimethyl siloxane emulsion.
